

A Dozen Good Reasons
to use the

PortaSafe®

Patented US Patent No. 6,820,843
Canada Patent No. 2,482,663

Collection System for Trash & Recycling

1. Adjustable steel tension uprights hold bag open without clips, or circumference bands.
2. Approved PortaSafe bags fit perfectly. Eliminates bags from sliding into container.
3. PortaSafe System offers integrated storage of coreless roll bags. Replacement bags are always "at the ready".
4. The System is designed to maintain a clean fresh appearance. Conventional containers attract dirt and germs, while providing a billboard for graffiti artists.
5. The PortaSafe system requires less labor to maintain a more sanitary image. Simply change the bag, as opposed to scrubbing, or power washing conventional containers.

6. Gain better control of bag usage, and waste, with PortaSafe coreless roll bags.
7. Eliminate stock piling of bags in the bottom of conventional, enclosed containers.
8. Reduce bag pilferage, through better control of usage.
9. Maximize full use of bag capacity, use fewer bags and still handle easily.
10. The Patented PortaSafe coreless roll bag system offers both front and rear dismount of heavy bags.
11. No employee back strain from awkward vertical lifting positions, as experienced with conventional containers. Simply slide bags from the rack.
12. Reduce costs such as lost workdays, legal, insurance and medical expenses as related to employee back injuries.

PortaSafe®

Ergonomically Safe Collection System

Are Employee Back Injuries Trashing Your Bottom Line?

According to the U.S. Department of Labor, Fact sheet No. OSHA 89-09, "Back injuries are the Nation's # 1 workplace safety problem". According to the Bureau of Labor Statistics, "more than one million workers suffer back injuries each year". "Further, one-fourth of all compensation indemnity claims involve back injuries costing industry billions of dollars on top of the pain and suffering borne by employees"

Reduce employee exposure to back strain as experienced with conventional containers.

Eliminate vacuum resistance pull thereby reducing MSD.

Uses:

- Trash Collection
- Lawn and Grounds
- Recycling Program
- Gloves and Linen Collection
- Kitchen/Food Prep Areas
- Mail Room/Shipping Handling
- ER/Hospitals
- Factory/Warehouse

Custom rack sizes and colors made to your specification.

Custom bag sizes, gauges and colors with imprint, available upon request.
